

## SPINE SURGERIES IN INDIA

The spine is a complex structure that supports the body and protects the spinal cord. When damaged due to injury, degeneration, or disease, it can lead to debilitating pain and mobility issues. For most of patients, India is a venue of choice that provides advance and value for money treatment possibilities.

India has emerged as a global hub for high-quality, affordable medical treatments, attracting patients from across the world. With JCI-accredited hospitals, internationally trained doctors, and cutting-edge technology, India offers world-class healthcare at a fraction of the cost compared to Western countries.

At UCall Medical Assistance, we are committed to helping patients access the best medical care India has to offer. Our experienced team coordinates every step of your healthcare journey—from initial consultation to full recovery—so you can focus on what matters most: your health.

### Common Spine Conditions We Treat:

- Herniated/Bulging Disc – Nerve compression causing pain, numbness, or weakness
- Spinal Stenosis – Narrowing of the spinal canal leading to pain & difficulty walking
- Scoliosis/Kyphosis\* – Abnormal curvature of the spine
- Degenerative Disc Disease\* – Age-related wear and tear causing chronic pain
- Spinal Fractures & Tumors\* – Trauma or cancerous growths affecting spinal stability

## TYPES OF SURGERIES

### A. Minimally Invasive Spine Surgeries

- Microdiscectomy – Removes herniated disc material pressing on nerves
- Endoscopic Spine Surgery – Tiny incisions, quicker recovery
- Laminectomy – Decompresses spinal nerves in stenosis

### B. Advanced Stabilization & Fusion Surgeries

- Spinal Fusion – Joins vertebrae to eliminate painful motion
- Artificial Disc Replacement – Preserves spine mobility
- Dynamic Stabilization – Flexible implants for controlled movement

### C. Cutting-Edge Technologies Used

- Robotic Spine Surgery – Ultra-precise implant placement
- Navigation-Guided Surgery – 3D imaging for accuracy
- O-Arm & Intraoperative CT – Real-time scans during surgery

### D. Non-Surgical & Alternative Treatments

- Epidural Steroid Injections – For nerve pain relief
- Radiofrequency Ablation (RFA) – Targets nerve pain signals

# Testimonials

1. **Shafick D.**

*"After struggling with severe back pain for years, I traveled for a minimally invasive microdiscectomy. The care I received was beyond my expectations. The staff was professional, and I was up and walking within days. I'm finally pain-free!"*

2. **Renuka V.**

*"I had a herniated disc surgery in India, and the care was exceptional. I began to walk the next day!"*

3. **Patrick B.**

*"I elected to go for Robotic Surgery. Robotic spine fusion gave me my life back. The precision was incredible."*
