YATHARTH SUPER SPECIALITY HOSPITALS

**GET
BETTER**
is not just
two words

GET BETTER

Is our assurance to patients. It is the passion of our doctors.
It is what our team strives for in tiny details. It defines all our successes in the past.
It is our inspiration to set new targets for the future.
It is a commitment to invest in better infrastructure, technology and people.
It is a challenge we start our day with. It is not just our philosophy.
It is the Yatharth way of life.

YATHARTH SUPER SPECIALITY HOSPITALS

OUR PILLARS OF STRENGTH

DR. AJAY TYAGI

(Chairman)

Born and brought up in a farmer family of a small town, he reversed the family business trend to become a Medical Professional and set an example for his younger brother and sister to pursue their careers in the same profession.

A graduate from LLRM Medical College, Meerut, Dr. Tyagi completed his Masters in Orthopaedics from King George Medical College, Lucknow, one of the most reputed colleges in India. Dr. Tyagi is known for his knowledge and constructive attitude towards his profession and even more towards his patients.

He oversees the planning, designing and funding of new projects, with a view to directing the Group towards optimum utilization of resources and funds. Keenly focused on Quality, he institutionalized strict adherence to pre-determined standards in every area of operations of the Groups hospitals.

DR. KAPIL TYAGI

(Managing Director)

Greatly influenced by his elder brother, Dr. Ajay Tyagi, whom he considers a pillar of strength and source of inspiration, he joined the medical profession.

Graduating from SN Medical College, Agra, Dr. Kapil completed his Masters in Orthopaedics from King George Medical College, Lucknow, one of the most reputed colleges in India. He then worked at several hospitals in Delhi including RML hospital and Lady Hardinge Medical College & Hospital. Subsequently he completed his M.Ch. in Orthopaedics.

Dr. Kapil Tyagi has been active in the field of medicine & orthopaedic surgery for almost 15 years. Dr. Tyagi's areas of specialization include joint replacement surgeries (primary & revision) and advanced trauma management. He has pioneered bilateral joint replacement of knee & hip joints i.e. replacing both joints in one sitting. He has done exclusive work on fractures in joint replacement. He has successfully performed numerous surgeries on accidental cases, which were clinically hopeless cases.

CORE TEAM

MR. YATHARTH TYAGI

(Director)

Mr. Yatharth can be defined as a new generation business leader with innovative ideas and corporate strategies along with practical executional plan to deliver. Having studied business management from Leeds, United Kingdom, he brings international business exposure to the group.

He has also done entrepreneurship semester in California, U.S.A. After that, Mr.Yatharth completed his post-graduation in International Health Management from one of the world's most prestigious university-Imperial College London.

His vision is to make Yatharth Hospitals, one of the biggest hospital chains of India, providing world class and sustainable healthcare for all. He wants to further steer the group entering into pharmaceutical sector, by setting up a manufacturing and R&D facility in a 15-acre plot, recently acquired by the group on Yamuna Expressway, Greater Noida.

MR. AMIT SINGH

(Group CEO)

Amit Singh is a Healthcare Management Professional with 15 years of experience in providing Operations leadership, Strategic Planning, Quality & Business Development in Healthcare organizations. He has been a part of top level management of various premiere healthcare institutions. Prior to joining Yatharth group, he has served as Vice President at BLK Hospital, Delhi, Group Vice President at Centre for Sight group of Eye hospitals, Chief Operating Officer at Point Hospitals, Business Head at Raksha Medicare.

He has extensive experience of setting up a chain of hospitals. He has proven experience in field of Strategic Planning & policy development, Business operations & administrations, Sales & Marketing Leadership, Budgeting & Cost Management and has thorough understanding of Quality and International safety standards.

**GET
BETTER**

is a quest for
our team

OUR INFRASTRUCTURE

YATHARTH Super Speciality Hospitals have advanced technology to ensure world-class health care to all patients.

YATHARTH Super Speciality Hospitals are one of the largest tertiary care private hospitals in the region. There are dedicated blocks for the major super speciality outpatient and inpatient services.

The infrastructure at Yatharth has been designed with a view to ensure timely and efficient services. Whether it is the state-of-the-art radiology and laboratory or ultra modern blood bank, the infrastructure speaks volumes about YATHARTH's commitment to **QUALITY HEALTHCARE**.

The hospitals have state-of-the-art well equipped modular and other operation theatres with three stage air filtration and gas scavenging system to ensure patient safety. The operation theatres are fitted with best in class pendants, operating lights, anaesthesia work stations and advanced information management system.

The group has one of the biggest critical care program in the region with 394 beds in different intensive care units- medical, surgical, cardiac, paediatrics, neonatology, neurosciences.

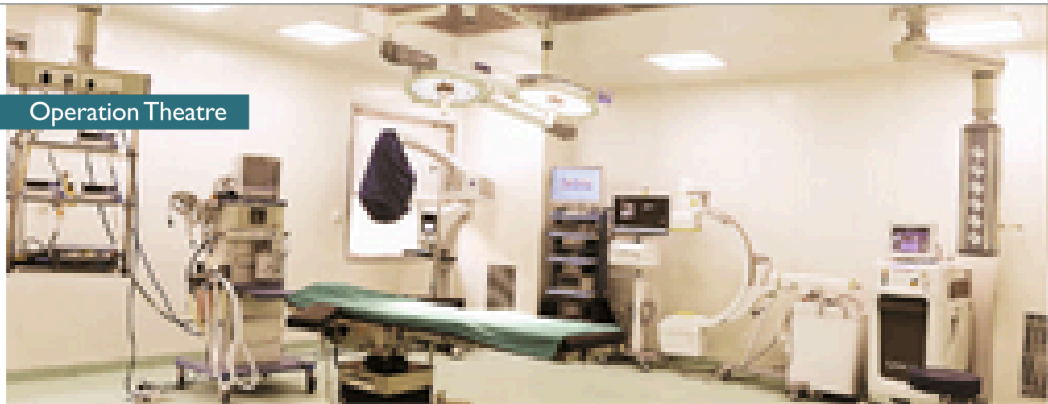

Each critical care unit is equipped with high end patient monitoring devices, ventilators and dedicated isolation rooms. Facilities for Haemodialysis, CRRT, SLED, Endoscopy and Bronchoscopy are available 24X7 by the bedside.

The hospital has specialized birthing suites with telemetric foetal monitors to follow the progression of labour. A dedicated operation theatre adjacent to the labour room helps in shortening the response time in case there is a need to conduct the delivery through surgical means.

The advanced building management system provides for multi-tiered access control, electronic security systems with integrated CCTVs spanning across the facility and advanced fire management system amongst other utilities.

CENTRE FOR BONE & JOINTS

YATHARTH Centre for Bone & Joints offers comprehensive care for various orthopaedic afflictions including knee, hip, spine and joint problems. It has various sub-specializations for the treatment of disorders of the musculo-skeletal system (muscles, bones & joints). The hospital offers dedicated services for trauma and general orthopaedics, spine surgery, sports medicine and joint reconstruction including minimally invasive surgery (mis) for total knee replacement, total hip replacement, hip resurfacing, unicondylar (partial) knee replacement as well as replacement of shoulder and elbow joints.

The centre regularly carries out arthroscopic procedure for sports and other injuries, limb salvage surgeries for bone tumors and reconstruction surgeries for deformities. The centre offers treatment for an array of disorders of muscles, bones, missing ligaments, nerves and joints.

The centre has a dedicated team for the treatment of spinal ailments including minimal invasive spine surgery (MISS), mobilization solutions and spinal fusion procedures, delivered using some of the most advanced techniques and technologies in this field. The centre is ably supported by world-class physiotherapy rehabilitation unit.

CENTRE FOR HEART

YATHARTH Centre for Heart provides a comprehensive range of diagnostics as well as therapeutic services for patients with cardio vascular ailments. The department provides dedicated round the clock services to all patients with heart ailments.

The department has a team of highly experienced and qualified faculty providing 24X7 Interventional cardiac services, such as coronary angioplasty and stenting (pci) and primary pci for acute myocardial infarction. The department routinely performs complex cardiac procedures like Mitral-valvuloplasties, Permanent Pacemaker Implantation, Cardiac Resynchronisation procedures, AICD (implantable cardioverter-defibrillator) implantation and procedures for congenital ailments such as coarctation of aorta, stenting and PDA closure. The centre offers full range of non-invasive and advanced diagnostic services.

The division of cardio-thoracic and vascular surgery is an established centre for coronary bypass surgery (CABG), valve replacement, valve repair, aortic root and aneurysm surgeries. Yatharth is amongst the few centres offering minimal invasive bypass surgeries in the region and most cardiac bypasses are total arterial revascularisation, off pump surgeries, making the centre at par with the best in the world. The department also offers a complete range of diagnostic and therapeutic options such as endovascular revascularization, AV fistula construction, DVT treatment, peripheral bypass procedures and peripheral angioplasty.

CENTRE FOR NEUROSCIENCES

YATHARTH Centre for Neurosciences provides comprehensive evaluation and therapeutic services to a wide range of conditions like stroke, brain hemorrhage, backache, spinal disorders, neuro-oncology, epilepsy and other neurological ailments. The department is equipped with advanced neuro-diagnostic services including EEG, EMG, NCV for the evaluation of a multitude of neurological conditions to provide accurate diagnosis and treatment of even the most complex cases.

The advanced neurosurgical centre offers surgical treatment for a wide variety of ailments such as head injuries & trauma, brain tumors, hydrocephalus, arterio-venous malformations and aneurysms. The centre has one of the most experienced team of interventional neurosurgeons for immediate and potentially life saving procedures for stroke and related neurological emergencies.

The minimally invasive neuro-spine surgery program offers most advanced solutions to the neuro-spine patients. In addition, the Centre offers minimal invasive treatment for disorders like disc prolapse, spinal tumors, spinal fixation and pituitary tumors as well.

CENTRE FOR RENAL SCIENCES & KIDNEY TRANSPLANT

YATHARTH Centre for Renal Sciences offers comprehensive diagnostic and therapeutic services for both adult and pediatric nephrological and urological conditions, including complex cases. We have a skilled and experienced team of experts who are internationally recognized for their work in endourology, reconstructive urology, uro-oncology, pediatric urology, andrology and renal replacement therapy. We have a robust kidney transplant program where experienced and skilled nephrologists, urologists and transplant surgeons work as a complete team.

The centre for nephrology has the facility of most advanced dialysis machines and offers round the clock service with facility for continuous renal replacement therapy (CRRT) for hemo-dynamically unstable patients and continuous ambulatory peritoneal dialysis. Isolation rooms for Hepatitis B&C patients are at par with global standards. The centre has a facility of 24x7 haemodialysis, hemodiafiltration, crrt and capd plasmapheresis.

The department of urology is equipped with latest diagnostic and therapeutic facilities like uroflowmetry, ultrasound, doppler, lithotripsy and holmium laser, etc. The department has dedicated suites for endoscopic procedures ensuring quality treatment as well as complete privacy in comfortable surroundings. Procedures like PCNL (percutaneous nephrolithotomy), ureteroscopy and most commonly TUR of prostate, bladder tumours and endoscopic removal of bladder stones, and optical internal urethrotomy are performed regularly. Also, procedures like PCNL, ureteroscopy and cystolithotripsy are done for all types of stones of the kidney, ureter and bladder. Urethral strictures are treated with optical internal urethrotomy. We also have advanced facility of urodynamics for voiding problem evaluation.

CENTRE FOR TRAUMA & CRITICAL CARE

YATHARTH Centre for Trauma & Critical Care provides 24/7 comprehensive care and life support services to patients who are critically ill and require intensive monitoring to be carried out by a multidisciplinary team. The equipment and state-of-the-art infrastructure of this department meets international standards so as to assist patient recovery. The critical care services are spread over a number of intensive care units (ICUs) and each of the beds have state-of-the-art equipment to keep track of vital parameters. We have intensivists with vast experience in their area of expertise present round the clock to provide care to critically ill patients.

Adult Critical Care: The ICU has the most advanced technology and equipments like advanced ventilators, multi para monitors, defibrillators, and bronchoscope. The invasive and minor surgical procedures are carried out bedside. Facilities for bedside diagnostics including ECG, X-rays, ultrasonography, echocardiography, fluoroscopy and procedures like bedside dialysis, endoscopy, bronchoscopy with emergency laboratory services are available round-the-clock.

Neonatal & Paediatric Critical Care: Level III NICU & Paediatric ICU are equipped with state-of-the-art equipment such as modern ventilators, multichannel monitor which includes invasive and non-invasive pressure monitoring besides basic vital parameters. Ventilators can carry out invasive and non-invasive ventilation in critically ill children. The unit is managed round the clock by dedicated and skilled pediatric nurses, resident doctors, clinical associates/junior consultants.

CENTRE FOR DIGESTIVE AND LIVER DISEASES & LIVER TRANSPLANT

YATHARTH Centres for Digestive & Liver Diseases is one the most advanced centres for digestive and hepatobiliary diseases. The centre has state-of-the-art endoscopy suites with a team of highly qualified and trained doctors with decades of experience in the treatment of GI diseases by medical, surgical and combined means.

The centre offers cutting-edge technology, like endoscopy with magnification and narrow band imaging capabilities. The department is fully equipped with facilities like argon plasma coagulation, hemoclip application along with other facilities for therapeutic endoscopy. We offer services like, ERCP, capsule endoscopy in appropriate patients.

We have complete infrastructural support including critical care, advanced radiological backup and are equipped with the state-of-the-art technology and instruments. We specialize in prevention, diagnosis and treatment of the entire spectrum of digestive tract and liver disease. We have a close co-ordination with gastro-surgical team to provide comprehensive care to admitted and outpatients.

The centre for gastrointestinal, hepato-pancreato-biliary surgery and liver transplant has the state-of-the-art facility with best equipment and the latest infrastructure. We have a team comprising of expert surgeons, gastroenterologists, intensivists, anesthetists, technicians and specialized nurses with vast experience in the management of gastrointestinal, hepatobiliary and pancreatic diseases.

CENTRE FOR MINIMAL ACCESS & BARIATRIC SURGERY

YATHARTH Centre for Minimal Access and Bariatric Surgery specializes in performing almost all major gastrointestinal, hepatobiliary, pancreatic procedures, cancer surgeries & bariatric surgeries. The hospital is privileged to have consultants with training in laparoscopic surgery from renowned international institutes & large teaching experience from reputed government institutions which are committed to provide ethical and evidence based surgical options to patients.

The department comprises of specialized units, providing round the clock emergency services & OPD services and is well supported by the Institute of Gastroenterology and Medical Oncology.

The department is equipped with high definition laparoscopic instruments and provides a wide variety of open and laparoscopic procedures for abdominal surgeries related to gallbladder, appendix, spleen & intestines, etc, various types of hernias (inguinal, femoral, umbilical, incisional & hiatus, etc.) and emergency trauma management. Surgeries of salivary glands, thyroid, adrenal, breast, undescended testes, hydrocele, varicocele, varicose veins & anorectal disorders like rectal prolapse, piles, fistula, fissure & perianal abscess are also routinely performed.

CENTRE FOR CANCER & BONE MARROW TRANSPLANT

YATHARTH Centre for Cancer is a comprehensive multidisciplinary institute. It brings in the latest technology with the most competent and highly skilled health care professionals under one roof. The centre offers end to end cancer treatment services starting from prevention to early detection to comprehensive treatment to palliative Care. The Centre is supported by state-of-the-art equipment in centres of pathology, radiology and blood bank to provide safe blood and blood components as per international standards and regulations.

The cancer centre offers holistic care for the cancer patients. The department also focuses on preventive oncology by screening, cancer awareness & educational program and vaccination. The highly skilled surgical team of Yatharth Super Speciality Hospitals is trained and experienced in operating head & neck cancers, breast cancers, GI cancers, gynae cancers, urological cancer and brain tumours.

Yatharth Hospital also offers facility for cancer surgeries to treat patients. After successful treatment, patient is followed up and taken care of for terminal malignancies by our oncologists. We offer personalized treatment to every patient to target various cancer types. In order to provide personalized, multidisciplinary care to cancer patients, our oncologists collaborate with experts from other departments, including surgeons, radiologists, nutritionists, physiotherapists.

CENTRE FOR MOTHER & CHILD

YATHARTH Centre for Mother & Child is the most comprehensive centre catering to the health needs of women and children.

Obstetrics & Gynaecology: Yatharth centre for gynaecology & obstetrics department is among one of the best in the region with advanced facilities available for antenatal care, painless pregnancy, high risk pregnancy and conventional gynaecology. The department also offers laparoscopic and hysteroscopic surgeries (ovarian cyst, hysterectomy, myomectomy for fibroids, laparoscopic tuboplasties, and laparoscopy treatment for infertility). We understand the special needs of a woman in all phases of her life. The centre has dedicated operating rooms for caesarean section in the same complex. We aim to provide the highest standards of medical and surgical patient care with excellence, backed by a team of well qualified and skilled professionals and most advanced instruments to provide gynecological health care services. Comprehensive treatment of cancer of the uterus, cervix, vagina, vulva and ovaries is provided by gynaecological surgeons in combination with medical oncologist where ever needed.

Paediatrics, Neonatology and Adolescent Medicine: The department of paediatrics, neonatology and adolescent medicine is one of the most comprehensive centres for child care in the entire region and provides excellent care in general paediatrics, asthma & allergy, critical care for children and neonates, adolescent medicine, child & adolescent psychiatry and psychology, developmental paediatrics, endocrinology, gastroenterology, haematology and oncology.

The hospital has a dedicated paediatric surgery program for a wide range of congenital and acquired conditions requiring surgical intervention. The level-III NICU unit is equipped with high-end monitors, incubators, and surfactant therapy to deal with any level of medical complications in the newborn. The centre also has advanced paediatric ICU managed by one of the most experienced team of highly specialized intensivists in the country.

CENTRE FOR PLASTIC & COSMETIC SURGERY

YATHARTH Centre for Plastic & Cosmetic Surgery has the distinctive strength of having both cosmetic and reconstructive surgeries under one roof. Services include craniofacial surgery, maxillo-facial surgery, reconstructive microsurgery, burns and acid injury surgeries, face lifts, tummy-tuck, body contouring, hair transplant and breast lift, among others. The department is helmed by super specialists credited with achieving high rates of success in even the most severe cases of trauma. Our team of skilled clinicians has helped hundreds of patients restore their normal life and lifestyle after severe accidents with successful reconstructive surgeries for even the most complex cases.

From initial consultation to the recovery process, our staff sincerely take care of every treatment procedure to bring your smile back. Our dentistry and maxillofacial surgery department complies with international guidelines in hygiene and infection control. We have a team of highly skilled, qualified and experienced dental surgeons in all specialities to offer dentistry services like prosthodontics, oral and maxillofacial surgeries, endodontics (RCT), periodontics (gum diseases), orthodontics (treatment with & without braces), pedodontics (teeth care for children), oral pathology & microbiology, cosmetic dentistry. The department of dental surgery offers comprehensive dental services like dental implants, all ceramic veneers & crowns, precious metal crowns, flexible valplast dentures, dental sealants, gum treatment, bone grafting, periodontics and prosthodontics.

INTERNAL MEDICINE

YATHARTH Department of Internal Medicine provides logical and holistic approach to management of various disorders like diabetes, cardiac conditions, obesity, high blood pressure, and vascular diseases. In addition, the department plays a pivotal role in providing need based care by optimal utilization of all medical and surgical super specialities in comprehensive management of patients.

Our clinical programs include comprehensive care for adults with chronic problems, acute illness and age-based preventive healthcare. Our clinical providers join in collaboration with other specialist health care providers to improve the health of our patients. The centre is backed by state-of-the-art ICU, 24 hours emergency, blood bank, pathology, radiology and imaging facilities.

ENT & COCHLEAR IMPLANT

The Department of ENT & Cochlear Implant at Yatharth combines the finest technology and skilled specialists to deal with the diseases in ear, nose, throat and head & neck region including ailments in the base of skulls and tumors in head and neck region.

Diseases pertaining to ear, nose, and throat are prevalent in society and often remain untreated or develop into severe condition due to negligence. With the introduction of advanced technology, our ENT department has become one of the best performing departments at Yatharth that is capable of curing severe conditions, like sinus, nerve deafness, etc. The problems related to head and neck region include benign and malignant tumors, facial trauma, facial palsy and deformities of the face are treated by experienced otolaryngologists.

ANESTHESIOLOGY

The Department of Anaesthesiology at Yatharth Hospital offers state-of-the-art anesthesia services to patients. Anesthesia is a pertinent part of any surgery and used to numb the pain so that the surgical procedure can be smoothly carried out. No surgery can be performed without anesthesia. An efficient and sound anesthesia service is vital to not only prevent pain but also to make surgery easier, faster and non-complicated for patients as well as doctors.

Yatharth takes pride to house excellent anesthesiology department where experienced anaesthesiologists are committed to taking care of patients during surgery. Our responsibility not only extends up to modern operation theaters (OTs) but goes beyond it. Our anesthesiology department encompasses highly advanced pre anesthesia clinic as well as post anesthesia care units through which our experienced anesthesiologists optimize pre-operative patient status, provide quality patient care in operation theatres, and ensure comprehensive patient care during early critical hours post-surgery. Different types of anesthesia impact the human nervous system differently. Our anesthesiologists are experts in assessing patient's medical readiness for the surgery, depending on the medical illness. We make the best effort to provide continual medical assessment to the patient and control patient's pain and level of consciousness to establish ideal condition required for safe and successful surgery.

LABORATORY MEDICINE

YATHARTH Super Speciality Hospital is among the few hospitals in the country to have laboratories accredited by NABL, corroborating the hospital's stand to provide the most reliable, accurate and advanced diagnostic services to the patients.

The laboratories are equipped with fully automated equipments seamlessly interfaced with hospital information system to provide the unique advantage of access to the laboratory reports from any location within the hospital and secured access to authorized individuals from any remote location. The patients also have the facility to view and download their outpatient laboratories reports with real time online access thus saving time, money and effort for patients and their relatives. The team consists of consultants of international repute working together with clinicians

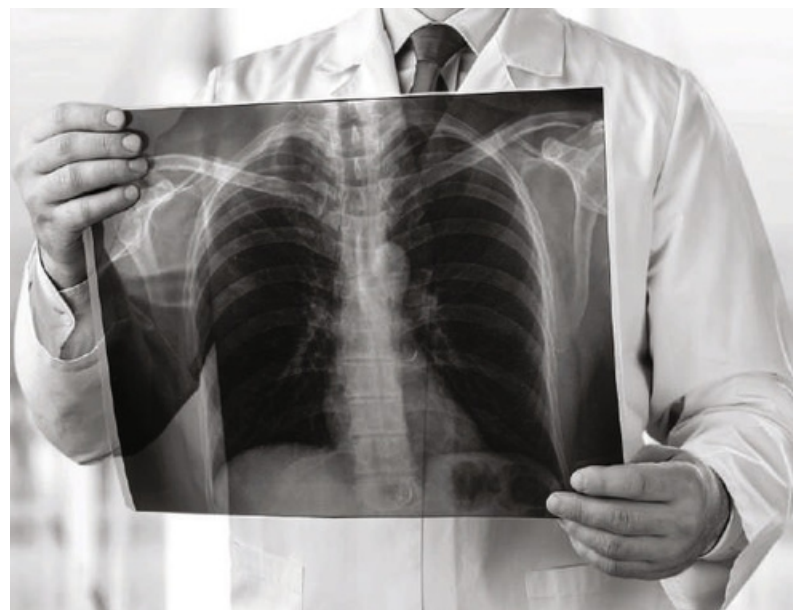

to provide comprehensive reporting for a wide range of tests. International accreditation and standardization guidelines are followed to deliver quality and accuracy in results. The services include biochemistry, microbiology, hematology, histopathology, serology and immunology among many others.

TRANSFUSION MEDICINE

The Department of Transfusion Medicine at YATHARTH Super Speciality Hospital has adopted best practices in blood transfusion services. The department provides safe leuko-depleted, micro-particle ELISA and CMIA tested blood. The blood bank is equipped with nucleic acid testing (NAT) facility ensuring safety of blood meant for transfusion. Blood utilization is optimized by separating blood into its various components like red cell concentrate, platelet concentrate, fresh frozen plasma and cryo-precipitate. The aim of the department is to promote use of various components to ensure optimum utilization of blood and also to ensure that the patient receives the safest possible blood by testing for various markers.

Other services offered by the department include aphaeresis, plasmapheresis, and leukapheresis. The immune-haematology lab is a valuable resource for routine needs. The transfusion department at the hospital is one of the few transfusion centres in the country to have received the coveted NABH accreditation from the quality council of India as an independent entity.

RADIOLOGY & IMAGING

The Department of Radiology and Imaging aims to ensure quality reporting and instant availability to patients. In order to deliver the most efficient and precise diagnostic services, YATHARTH Super Speciality Hospital has put in place the latest and cutting edge technology and infrastructure. A complete cardiac CT scan can be performed in less than five seconds. The MRI reduces scan time by half while providing far greater accuracy.

The department offers services like digital X-Ray, 128-slice CT scanner, 1.5 Tesla MRI volume scanner, 3D and 4D ultrasound, colour doppler, mammography and bone densitometry. The imaging systems are advanced to offer excellent viewing quality for accurate reporting.

PREVENTIVE HEALTH CHECK

YATHARTH's Preventive Health Check-up packages comprise of a complete set of tests and are designed keeping in mind the disease risk profile, which varies with age, gender and lifestyle patterns and cover every aspect of various health needs.

Our preventive health check-up lounge offers end-to-end care for individuals from initial consultation, selection of relevant package, scheduling, co-ordination with clinical experts and reporting. Specific focus is laid on the ambience and environment within the facility to make the individuals feel healthy and positive throughout their visit to the hospital. A specific set of health check up packages has been designed keeping in mind the lifestyle of corporate employees as well. The hospital offers focused screening packages for a multitude of lifestyle related ailments and chronic diseases.

PHYSIOTHERAPY & REHABILITATION

The Centre for Physiotherapy & Rehabilitation aims to enhance and restore maximum movement and functional ability for the patients with physical impairments or disabilities. The disorders could affect brain, spinal cord, nerves, bones, joints, ligaments, muscles to tendons. The centre offers a holistic care to the patients. We have a team of experienced therapists including physiotherapist, occupational therapist, speech and language therapists, who work closely with the patients to maximize their quality of life. The functions of the department include undertaking a comprehensive examination and assessment of the patient, evaluating findings from the assessment

to make clinical judgments regarding patient, formulating a diagnosis, prognosis and plan, providing expert consultation and determine the physiotherapy and rehabilitation plan, determining if the patient needs cross consultation from another healthcare professional and making recommendations for self-management.

NUTRITION & HEALTH

The nutritional advice is an essential part of the prevention and treatment module of various diseases. Medical treatment for several conditions like obesity, diabetes, dyslipidemia, renal dysfunction include diet therapy. The unprecedented journey of maintaining good health begins through diet changes and following suggestions provided by nutritionist according to each person's health assessment. It is crucial to get diet advice and get a complete dietary analysis done to ensure that all the health requirements are met.

The Nutritional Clinic at Yatharth Super Super Speciality Hospital is staffed with highly qualified nutritionists in the areas of clinical nutrition, nutritional assessment, nutrition education, nutrition counseling, and management of many nutrition-related diseases and problems.

OUR SPECIALITIES

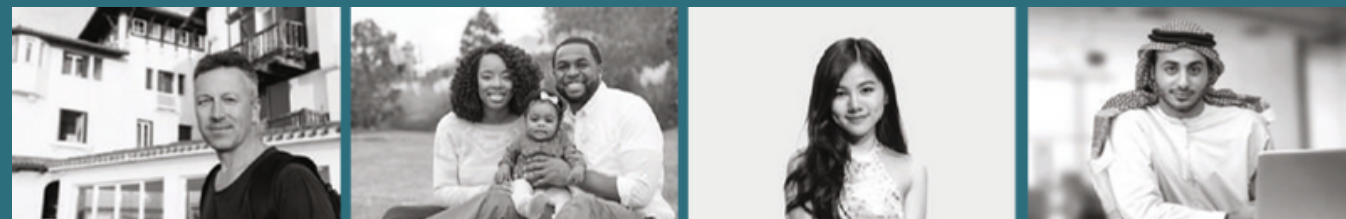

INTERNATIONAL PATIENT SERVICES

Since its inception, YATHARTH Super Speciality Hospital has been a preferred destination for international patients seeking specialised healthcare services in India. The hospital has attended to the healthcare needs of thousands of global citizens from South East and Central Asia, Middle East, Africa, Europe and North America. There is a dedicated lounge for international patients with facilities for communication assistance with physicians, family and friends at home, via free internet access. The hospital has a team of in-house interpreters trained in multiple languages who assist the patients throughout their visit to YATHARTH.

The hospital offers personalised services to overseas patients including query handling, identifying physicians in advance to meet the patients' specific needs, coordination for doctor's appointment and surgery, VISA and FRRO assistance, airport pick-up and drop facility, currency exchange facilitation, mobile & calling card arrangements, organizing accommodation for the attendants and patients' families within the vicinity of the Hospital, cuisine of the patient's choice, travel, tour & ticketing assistance, and post discharge follow-up.

YATHARTH Super Speciality Hospitals have a dedicated team for international patient services. This well-trained dedicated team takes care of all clinical and administrative requirements of patients and their companions coming from overseas. A personal coordinator/case manager is assigned to each patient, and is responsible for taking care of all aspects of patients' visit to India, ensuring that they feel at home at YATHARTH. The services are focused on meeting the special needs of the patients and their families, before, during and after their visit.
